---

**A BILL**

To provide grants to units of general local government related to pre-reviewed designs for mixed-income housing, and for other purposes.

1       *Be it enacted by the Senate and House of Representa-*  
2       *tives of the United States of America in Congress assembled,*

3       **SECTION 1. SHORT TITLE.**

4       This Act may be cited as the “Accelerating Home  
5       Building Act of 2025”.

6       **SEC. 2. FINDINGS.**

7       Congress finds the following:

1           (1) The United States faces an acute housing  
2           supply crisis. As of 2023, the United States faced an  
3           estimated housing shortage of 4,870,000 units.

4           (2) An increasing share of households are cost-  
5           burdened or severely cost-burdened. In 2023, 24  
6           percent of all homeowner households and 50 percent  
7           of all renter households were cost-burdened.

8           (3) Complex and restrictive land use regula-  
9           tions, permitting processes, and related regulatory  
10          burdens hinder housing production and drive hous-  
11          ing costs.

12          (4) Pre-reviewed designs, also known as pattern  
13          books, are sets of construction plans that are as-  
14          sessed and approved by localities for compliance with  
15          local building and zoning standards to streamline  
16          approval pathways for construction.

17          (5) For developers, faster and more predictable  
18          permitting through pre-reviewed designs increases  
19          access to housing development opportunities and  
20          makes new home construction possible.

21          (6) For communities, pre-reviewed designs en-  
22          sure that future development includes positive design  
23          features while simplifying review of construction  
24          plans.

1           (7) Developing pre-reviewed designs strikes a  
2           balance between local architectural features and  
3           rapid home construction.
